

The scatter plot displays the relationship between the number of hours per week (X-axis) and the number of hours per day (Y-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0 to 10. A dashed horizontal line is drawn at Y=10. Data points are green circles. Most points are clustered near the top of the plot, indicating high values for both variables. There are a few points at lower values, around 4-5 hours per week and 4-5 hours per day.
